BUSINESS DESCRIPTION:

Before starting the Business in UK, we did research of the European market and found out that virtually all individuals, entrepreneurs and small business owners have difficulty choosing and paying for IT services.

We understand that the payment for IT solutions is very vague, we are changing stereotypes, we provide a fixed price for our services, and if our work turns out to be too laborious, consider it done at our expense

We focused to serve the B2C (80%) and B2B (20%) clients.

IT services is supposed to be fast and convenient for each potential customer.

How it works: The client sent a request on the site, the support team checks the request, contacts the client, and issues an invoice. After paying the invoices, a specialist contacts the client to discuss the work.

Jurisdictions that are in the scope of our interest: Europe, Canada, USA

MONEY FLOW:

1. Flow funds:

In: payments from customers, transfers between accounts, top-up account from PSC (UBO) Out: settlements partners (service providers), pay taxes, salaries, and other operational costs
